

9 January 1968

MEMORANDUM FOR: Mr. Bross

SUBJECT : Wollenberg Request for TOD Data
from CIA

1. This is merely to alert you that in the course of a discussion with Bill Wollenberg today regarding our strategy toward NSA, he indicated that he expected to receive from us for use in his Pentagon office a copy of the CIA TOD submit. I told him this would not be available, and I was under strict instructions that the CIA information should not leave this building. I told him that this was a condition upon which we are to receive the detailed CIA report and that you and the Director had laid down this working rule.

2. Neither Bill nor I sought to make a hard issue of this, and I, in effect, patted him on the back by saying that it was in our mutual interest to protect the very tender TOD infant. I pointed out that when it came to analyzing the materials there was enough work to be done on some of the DOD materials so that Bill could make a very worthwhile contribution on behalf of the TOD Committee. I urged him not to make an issue of this at the moment, but I think it likely that at some point in the near future he will bring the matter up with you.
